DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-40 of U.S. Patent No. 6,681,874 in view of Schellstede et al (US 4,639,258).

The claims of the U.S. Patent No. 6,681,874 disclose all of the steps as claimed except for the step of cleaning debris from the apertures of the hollow elongate member. However, Schellstede et al teach cleaning a screen assembly occasionally in order to optimize the operation of the screen assembly. It would have been obvious to one of ordinary skill in the art at the time the invention was made to clean the apertures of the elongate member of the U.S. Patent No. 6,681,874 in view of the teaching of Schellstede et al (column 12, lines 19-42).

Specification

3. The disclosure is objected to because of the following informalities: On page 1, the "Cross References to Related Applications" paragraph should be directly above the "Back Ground of the Invention" paragraph.

Appropriate correction is required.

Conclusion

4. All of the references listed on the attached form PTO-892 were cited during the prosecution of the parent application Serial No. 10/055,561.
